11.2 Busy flag check timing

Note: IR7, IR3: Instruction 7th bit, 3rd bit; AC3: Address Counter 3rd bit.

12. Initialization of LCM

The LCM automatically initializes (reset) when power is turned on using the internal reset circuit. If the power supply conditions for correctly operating of the internal reset circuit are not met, initialization by instruction is required. Use the procedure is next page for initialization.

(Note 1) $10 \text{ ms } \ge \text{ trcc } \ge 0.1 \text{ ms}$, $\text{toff } \ge 1 \text{ ms}$.

(Note 2) toff stipulates the time of power OFF for momentary power supply dip or when power supply cycles ON and OFF.

Item	Symbol	Test condition	Limit (Min.)	Limit (Max.)		Unit				
Power supply rise time	trcc		0.1	10		ms				
Power supply off time	toff		1			ms

15. Software Example

15.1 8-bit operation (8 bits 2 lines)

Function								D			Display	Description
	S	w	7	6	5	4	3	2	1	0		
Power on delay												Initialization. No display appears.
Function set	0	0	0	0	1	1	0	0	X	X		Sets to 8-bit operation and selects 2-line display and 5x7 dots character font. (Note: number of display lines and character fonts cannot be chang after this.)
Display OFF	0	0	0	0	0	0	1	0	0	0		Turn off display.
Display ON	0	0	0	0	0	0	1	1	1	0	_	Turn on display and cursor
Entry Mode Set	0	0	0	0	0	0	0	1	1	0	_	Set mode to increment the address by one and to shift the cursor to the right, at the time of write, to the DD/CG RAM Display is not shifted.
Write data to CG/DD RAM	1	0	0	1	0	1	0	0	1	1	S_	Write "S". Cursor incremented by one and shift to right.
Write data to CG/DD RAM	1	0	0 0 0	1	0	0 0 0	0	1	0 0 1	1	SDEC_	Write "D", "E", and "C".
Set DD RAM			_	_	0	0	0	0	0	0	SDEC	Set RAM address so that the cursor is propositioned at the head of the second line.
Write data to CG/DD RAM					*						SDEC CR_	Write "C", and "R".
Cursor or display shift	0	0	0	0	0	1	0	0	X	X	SDEC CR	Shift only the cursor position to the left.
Write data to CG/DD RAM					*				•		SDEC CO., LTD	Write "O., LTD." .
Entry Mode Set	0	0	0	0	0	0	0	1	1	1	SDEC CO., LTD	Set display mode shift at the time during writing operation.
Write data to CG/DD RAM	1	0	0	1	1	1	1	0	0	0	DEC O., LTD. x_	Write "x". Cursor incremented by one and shift to right. (The display move to left.)
Write data to CG/DD RAM					*							Write other characters.
Return Home	0	0	0	0	0	0	0	0	1	0	SDEC CO., LTD.	Return both display and cursor to the original position (Set address to zero).

15.2 4-bit operation (4-bit, 1 line)

Function	RS	R/ W	D7	D6	D5	D4	Display	Description
power on delay								initialization. No display appears.
Function set	0	0	0	0	1	0		Sets to 4-bit operation. In this case, operation is handled as 8-bits by initialization, and only this instruction completes with one write.
Function set	0 0	0	0	0	1 x	0 x		Sets 4-bit operation and selects 1-line display and 5x7 dot character font on and resetting is needed. (number of display lines and character fonts cannot be changed hence after).
Display ON/OFF Control	0	0	0 1	0 1	0 1	0	_	Turn on display and cursor.
Entry Mode Set	0 0	0	0	0 1	0 1	0	_	Set mode to incremented the address by one and to shift the cursor to the right, at the time of write. to the DD/CG RAM display is not shifted.
Write data to CG/DD RAM	1 1	0	0	1 0	0 1	1 1	S_	Write "S". Cursor incremented by one and shift to right.
		·	·	•	•	S	ame as 8-bit o	peration

17. Functional Test & Inspection Criteria

17.1 Sample plan

Sample plan according to MIL-STD-105D level 2, and acceptance/rejection criteria is.

Base on: Major defect: AQL 0.65 Minor defect: AQL 2.5

17.2 Inspection condition

Viewing distance for cosmetic inspection is 30cm with bare eyes, and under an environment of 800 lus (20W) light intensity. All direction for inspecting the sample should be within 45° against perpendicular line.

17.3 Definition of Inspection Zone in LCD

Zone A: Character / Digit area

Zone B: Viewing area except Zone A (Zone A + Zone B = minimum Viewing area)

Zone C: Outside viewing area (invisible area after assembly in customer's product)

Note: As a general rule, visual defects in Zone C are permissible, when it is no trouble for quality and assembly of customer's product.

17.4 Major Defect

All functional defects such as open (or missing segment), short, contrast differential, excess power consumption, smearing, leakage, etc. and overall outline dimension beyond the drawing. Are classified as major defects.

17.5 Minor Defect Except the Major defects above, all cosmetic defects are classified as minor defects.
